

## WHELEN SIREN DIAGNOSTIC & PROGRAMMING SOFTWARE

### SDPTS

The SDPTS is our software CD which, when programmed into a PC or laptop, makes maintaining your Whelen Mass Notification Products as simple as reading a screen. Use it to **CONFIGURE, RE-CONFIGURE, COLLECT DIAGNOSTIC DATA** and **ACTIVATE** from a specific station.

**SDPT** Whelen provides the software program. Our software can be enabled using a PC or laptop. Technology changes quickly, and Whelen is continually adapting to meet those changes.

### CONFIGURE

Allows user to extract the current configuration from the Mass Notification System. Unique capability of determining configuration set-up.

### RE-CONFIGURE

Allows user to make configuration changes to a specific station. Typically factory-set configurations are standard. The user can change configuration settings in the field when the software is installed on and operated from a PC or laptop.

### COLLECT DIAGNOSTIC DATA

Allows user to collect data from a specific station. Perhaps the most important feature. Standard within our software is the capability to display the mass notification station's function status of the following:

- System's Power
- Amplifiers
- Drivers
- DC voltage
- AC voltage
- Rotor position
- Signal-to-noise ratio
- Intrusion
- Bias
- Current revision of the control board firmware
- Command currently being executed
- Activation counter
- Loss of AC counter
- Marginal radio receptions
- Low battery shutdowns
- Minimum DC voltage
- Maximum DC voltage

### ACTIVATE

Allows user to activate from any station. Within the software is the capability to activate the following functions:

- All available tones
- 16 digital voice messages
- Rotor positioning
- Arm
- Dis-Arm
- Tone On
- Tone Off
- Test Clear
- Transmit Off
- Strobe Test
- Strobe On
- Strobe Off

### SYSTEM REQUIREMENTS

- Intel Pentium 4 processor
- Microsoft Windows XP with Service Pack 2 or Windows Vista, and Windows 7, 8, 10, 11
- 512 MB of RAM (1GB recommended)
- 10MB of available hard disk space

### ADDITIONAL PREREQUISITES

- Windows Installer 3.1
- Microsoft .NET Framework version 3.5 or later
