## MASS NOTIFICATION WARNING PRODUCT

### A.I.D...ALERT, INFORM & DIRECT

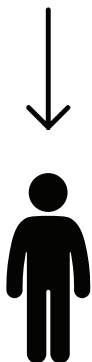

The basic purpose of a Mass Notification product is to ALERT through a tone, INFORM & DIRECT through voice. If your current siren system is only producing a tone, then it's only doing half of the job.

The most effective way to warn the public is to issue a tone warning and follow it with a clear, deliberate and powerful voice message. This three step approach, ALERT, INFORM & DIRECT will eliminate confusion, restore order and most importantly, save lives.

Our WPS2900 Series accomplishes this in three ways. One is to ALERT, the other is to INFORM & DIRECT through omni-directional tone and voice warning.

Our WPS2900 Series delivers voice warning and broadcasting of unequalled clarity at uniform power levels (+-1dB) throughout 360°

Ten models serve a wide variety of applications as shown here in ratio to a person's size.

### WHELEN EZ-PULL™ SPEAKER

Notice in these photos how easy it is to remove a 2900 Series speaker driver. Each speaker cell uses one EZ-PULL 400 watt driver, eliminating distortion and power loss that occurs from mixing the outputs of multiple speaker drivers in a cell - as found in competitive products. The EZ-PULL driver is Whelen Engineering's latest innovation. A handled plate connected to our 400 watt driver is an industry first. Serviceability has never been easier!

Whelen **WPS2900 Series** products are **wind-tunnel tested** to insure performance and reliability in the most trying conditions.
